

Company Profile

AVG GOLD PARTNER

Joining AVG since 2007, we are proud to say that we are now their Gold Partner in just a year's time. A globally distributed malware protection software, we are one of the elite partners to serve over 40 million users.

IBM PARTNER

IBM is committed to cultivate the use & development of IT in Singapore, targeting Singapore as a regional & global hub of knowledge-based industries.

Partnering with IBM will provide our customers outstanding products & services from IBM & us.

MYOB PARTNER

As Professional Partner for MYOB, we provide business consultancy, pre-sales, implementation and training for this widely used accounting solution.

Pacific LANWorks Pte Ltd is a dynamic system integrating and consulting company, specializing in providing sound, secure and cost-effective I.T. and accounting solutions to SMEs (Small & Medium Enterprises), empowering and accelerating their growth. Our solutions encompass multi-vendor software and hardware products.

Incorporated since February 2002, Pacific LANWorks Pte Ltd was initially set up as a sole-proprietor, providing desktop support to a few small companies and a handful of home users.

Within a short-span of 3 years, we have grown from a one-man operation providing mono-service, to a team of dedicated staffs, each of which is a professional in its own field.

Pacific LANWorks Pte Ltd is established on the assumption that the management of information technology for business is similar to legal advice, accounting, graphic arts, and other bodies of knowledge, in that it is not inherently a do-it-yourself prospect. Smart small business people who aren't computer hobbyists need to find quality vendors of reliable hardware, software, service, and support. They need to use these quality vendors as they use their other professional service suppliers, as trusted allies.

... we offer a wide range of products to cater for the needs of any SMEs or even MNCs. Every product we resell has to pass through our stringent requirements to ensure that they deliver their promises, just so to ensure that we deliver ours...

We serve our clients as trusted allies, providing them with the loyalty of a business partner and the economics of an outside vendor. We stay abreast with the latest technology to ensure that our clients have what they need to effectively run their businesses with maximum efficiency and reliability. As many of our information applications are mission-critical, our clients have the assurance that we will be there when they need us.

To ensure delivery of quality consulting services, Pacific LANWorks aligns with partners who are leaders in their respective fields, such as IBM, Microsoft, MYOB, Fortinet, AVG, Symantec and Linksys, just to name a few.

As professional partners for MYOB, we also provide business consultancy, pre-sales, implementation and training for the accounting solution.

Growing over the years with our maturity in services and excellence in system integration, we progress with a clear vision of brilliance in IT.

SUPREMEBUZZ PARTNER

As SupremeBuzz Asia Pacific's only hosting partner, we are assured of providing state-of-the-art hosting service to our customers, ensuring high uptime and prompt services, not to mention the acute competitive edge against others.

MICROSOFT PARTNER

A proud partner of Microsoft since our incorporation, the bond between us provides the arsenal towards our business goal.

SYMANTEC PARTNER

A world leader in security software, Symantec is focused on helping customers protect their infrastructures, their information, and their interactions. Our job? To ensure that our customers understand the need for all these protections.

What We Do

...as a service-oriented partner, we emphasize a lot on providing high quality and value-added services to our customers, ensuring that your satisfaction, recognition and trust is our utmost priority...

All businesses need constant help and support to maintain and manage their I.T. infrastructure, usually in-house or outsourced to a third-party.

Many small businesses neither have the luxury, nor the necessity, to employ an in-house I.T. administrator to take care of their computer network, and therefore, the job is usually appointed to one of the staffs as his/her secondary job role.

However, the problem with this arrangement is that the particular staff will be spending most of his working hours meddling the computers and networks, flipping through manuals and researching through the Internet, spending considerable amount of time to fulfill his secondary role and yet unintentionally neglecting his primary job.

This kind of arrangement does not help the company to save any cost, but in fact, it is eating up the company's main income resources and efficiency. Furthermore, due to the lack of experience, the staff might not be able to visualize the growth path of the organization's I.T. infrastructure, and may procure hardware and software solutions that may solve the current problem, but yet do not cater for the future growth.

Our maintenance agreement allows our customers to get the most economical rates and priority scheduling when problems arise.

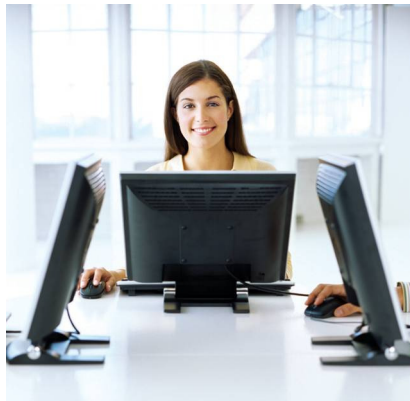

No businesses are exactly alike, and so there will never be a one-size-fits-all solution for any business I.T. requirements. For every customer, our work starts with inquiring into the breath and depth of the business, ensuring that we understand your workflow, needs, and requirements.

When designing a solution for you, we will always balance the cost, effectiveness and relevancy of the solution, and at the mean time, ensuring that best-of-breed technologies are fully utilized.

Why Us?

- Low service rates
- Regular maintenance schedules
- Able to stock key components for your business as needed
